SUMMARY

Computer Science graduate from Universitas Gunadarma (GPA 3.62/4.00) with hands-on experience designing and executing test cases using Black-Box Testing, achieving a 100% pass rate (17/17 scenarios) in functional testing of a chatbot application, and conducting usability testing with a SUS Score of 87.75/100 from 20 respondents. Supported by back-end development experience in verifying system functionality against specifications, along with knowledge of Waterfall SDLC and basic SQL relevant to the testing process.

WORK EXPERIENCE

Web Developer — PT Nusapromedia

November 2023 – March 2024

Client: DPRD Kota Bekasi | Stack: PHP (CodeIgniter 4), MySQL

- Contributed to the back-end development of a web-based official travel application (PHP/CodeIgniter 4, MySQL) in a collaborative team using Git, ensuring each completed module worked according to specifications before being integrated into the team repository.
- Verified the integration between the application and MySQL database in each feature development cycle, running local functional tests (php spark serve) to ensure the work met expectations before pushing to the repository.
- Participated in progress presentation meetings for the web application development to the DPRD Kota Bekasi client, and gained direct insight into communication between the development team and the client.

PROJECTS

Telegram Chatbot GameVerse

September 2025

Python, python-telegram-bot, RAWG.io API, Finite State Machine, Railway

- Designed and executed 17 Black-Box Testing scenarios to verify all chatbot features, achieving a 100% pass rate (17/17 scenarios passed) and a SUS Score of 87.75/100 (Grade A+, Excellent) from 20 respondents.
- Built a Telegram chatbot with 6 search features (by title, platform, genre, tag, developer, and game store) including a release year filter, using Finite State Machine (FSM) architecture and Waterfall SDLC methodology.
- Deployed the application to Railway via GitHub integration and verified that all chatbot features worked as expected.

SKILLS

Testing: Manual Testing, Black-Box Testing, Usability Testing (SUS), Test Case Design

Programming: Python, PHP (CodeIgniter 4)

Database: MySQL, SQL Server, phpMyAdmin

Tools: XAMPP, Visual Studio Code, Git, SQL Server Management Studio, Microsoft Excel, Google Sheets

Networking & Security Fundamentals: TCP/IP & OSI Layer, VLAN, CIA Triad, Basic Cryptography

Languages: Indonesian (Native), English (Intermediate)

EDUCATION

Universitas Gunadarma — Bachelor of Informatics

September 2021 – September 2025

GPA: 3.62 / 4.00

- Completed programming and database lab courses using Python, PHP, and MySQL, as well as a computer networking lab using Cisco Packet Tracer for network topology simulation and device configuration.
- Used tools including Cisco Packet Tracer, MySQL, phpMyAdmin, XAMPP, Visual Studio Code, and Git.

CERTIFICATIONS

Professional Certifications

Junior Computer Network Technician — BNSP

Valid: September 2025 – September 2028

Networking Basics — Cisco Networking Academy

February 2026

Introduction to Cybersecurity — Cisco Networking Academy

October 2025

Introduction to Information Security — Cyber Academy Indonesia

September 2025

University Internal Training

SQL Server for Intermediate — Universitas Gunadarma

February 2024

SQL Server for Beginner — Universitas Gunadarma

February 2023

Fundamental DBMS — Universitas Gunadarma

February 2022
